

Australia Cargo Team

2019 Finalist: Best Cargo Handling Operation

Last year, our Australia Cargo team's nomination made the shortlist for Best Cargo Handling Team. Here's the entry that caught the judges' attention:

Driver Induction training: designed and developed a driver induction and sign-in management solution for third parties who are afforded access to our cargo terminals. Terminals were provided for efficient, effective and safe visitor induction ensuring visitors understood and accepted our site rules.

Enhanced Air Cargo Examination program: Our facilities were upgraded to provide primary (dual view x-ray and electronic metal detection) and secondary (explosive trace detection) security screening equipment to ensure compliance and solutions to our customers.

The Best Cargo Handling Operation category identified handlers who have risen to the challenge of diverse product mix by designing dynamic warehouse services and celebrated operators who go above and beyond to guarantee premium customer services.
