

MORSE Month 2020

Week 3: Safely

Activity: Refuelling Drive Off

Facilitator: Manager, supervisor, team leader or safety & security representative

Who can take part: operators and fuel agents, but anyone else can join in too

Where can this take place: anywhere!

Time: 20 minutes

Additional resources: film clip (see below)

In the last 12 months there have been multiple events reported in MORSE that saw the refuelling vehicle driven away from the aircraft with the couplings connected otherwise known as a 'refuelling drive away/off'. This can cause substantial and costly damage to the aircraft and result in a significant delay.

Objectives

- Refresh Operators/Fuel Agents on the key controls to prevent 'refuelling drive away/off's' from aircraft
- Further embed the fuelling disconnection sequence procedures and most importantly the 360 walkaround

How do I facilitate this activity?

We recommend this activity is facilitated by a manager, supervisor, team leader or safety & security representative

- Gather your audience and watch the video clip
https://johnmenzies.sharepoint.com/sites/MORSE.month2020/Shared%20Documents/3.%20Safely/MM_3S_Refuelling_Drive_Off_film.wmv
- Discuss the objectives of this activity and ask the question: would our current procedures stop a 'refuelling drive away/off' from occurring?
